ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
p01	DIY enthusiast needing fast estimates for projects	skeptical	new	openai / gpt-4o-mini	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA situation: looking for quick project estimates online (<i>basis: users often seek fast solutions for home projects</i>) Responses: Attention: 4/5 — The ad effectively captures attention with bold statements like 'Goodbye Spreadsheets. Hello Real-Time Pricing.' which resonate with my need for fast estimates, making it hard to ignore. o8 o9 Credibility: 3/5 — The ad presents a partnership with Home Depot, which adds credibility, but I still need a demo of the AI tool to fully trust its claims about saving time and increasing jobs. o25 Action intent: 3/5 — While the ad's promise of generating instant estimates aligns with my needs, my skepticism about the price and effectiveness makes me uncertain about taking action without further proof. o3

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
	estimate tools				Supplied (from brief): target audience is aged 20-60 in the USA • situation: researching tools for home repair estimates (<i>basis: users often compare tools before making a decision</i>) Responses: • Attention: 4/5 — My biggest pain is slow, manual estimate generation, so the 'Goodbye Spreadsheets. Hello Real-Time Pricing.' headline plus a real sample estimate with line items like 'Demo Floor Tile 25 x \$77.00 / HRS' and a \$4,302.50 total clearly draws me in. o8 o9 o17 o12 o14 • Credibility: 3/5 — Trust is one of my decision criteria and I need social proof from other users, but the ad only shows unverified claims like 'win 3x more remodeling jobs' and 'Save 20+ hours per week' with no testimonials; the Home Depot logo and the itemized estimate with specific unit pricing make it only partly believable given my doubt about whether it works as promised. o25 o27 o28 o15 o17 • Action intent: 3/5 — I'm actively researching estimate tools and this matches my job-to-be-done of AI estimates with local pricing, so I might click 'Learn more,' but with high price sensitivity, no pricing shown, and no user reviews to ease my objection that it may not work as promised, I won't commit beyond researching. o3 o29 o26
p03	handyman looking for efficient estimate solutions	receptive	new	deepseek/deepseek-v4-flash	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA • situation: browsing for new estimate tools during a project (<i>basis: users often look for solutions while engaged in tasks</i>) Responses: • Attention: 4/5 — The bold 'Goodbye Spreadsheets. Hello Real-Time Pricing.' headline and Home Depot imagery grab me right away—I'm a handyman tired of manual estimates, so that contrast really stands out. o8 o9 o25 o30

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					• Credibility: 3/5 — The Home Depot partnership adds authority, but the 'win 3x more jobs' and 'save 20+ hours' claims feel inflated without proof or a trial, and I'm cautious about switching effort. o25 o27 o28 • Action intent: 3/5 — I'd click 'Learn more' because it promises to solve my slow estimate problem, but with high price sensitivity and no trial access mentioned, I'm not ready to fully commit. o3 o29
p04	casual DIYer needing trustworthy estimate tools	skeptical	casual	openai / gpt-4o-mini	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA • situation: considering tools for home projects (<i>basis: users often evaluate options before committing</i>) Responses: • Attention: 4/5 — The ad effectively captures attention with bold statements like 'Goodbye Spreadsheets. Hello Real-Time Pricing.' which resonate with my need for efficient estimate tools, making it hard to ignore. o8 o9 • Credibility: 3/5 — While the ad mentions winning '3x more remodeling jobs' and saving '20+ hours per week', I remain skeptical about these claims without seeing ROI examples from other users, which I need for trust. o27 o28 • Action intent: 3/5 — The promise of generating instant AI estimates with local pricing aligns with my job to be done, but my uncertainty about whether it fits my needs holds me back from a stronger intent to act. o3
p05	occasional fixer-upper seeking convenient solutions	neutral	casual	z-ai/ glm-5.3-flash	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA • situation: exploring options for home improvement (<i>basis: users often seek solutions during planning stages</i>) Responses: • Attention: 3/5 — As a hands-on occasional fixer-upper scrolling DIY

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					content, the familiar Home Depot logo and the bold 'Goodbye Spreadsheets. Hello Real-Time Pricing.' hook make me pause since instant AI estimates with local pricing are exactly what I need, though the 'win 3x more remodeling jobs' contractor pitch isn't really aimed at a casual DIYer like me. o8 o9 o25 o3 o27 • Credibility: 3/5 — The detailed estimate screenshot with concrete line items like '\$4,302.50' demolition and '\$77.00 / HRS' tile demo feels believable for a price-sensitive planner, and the Home Depot co-branding adds authority, but my proof need for data security guarantees is completely unaddressed and the '3x more jobs' and 'Save 20+ hours' claims are unverified. o14 o17 o25 o27 o28 • Action intent: 3/5 — Since I'm exploring options and the low-commitment 'Learn more' CTA plus 'instant AI estimates with local pricing' match my job-to-be-done of simplifying estimates, I might click, but with high price sensitivity and no tool pricing shown, plus my 'timing doesn't work for me' objection, I'm not ready to commit. o3 o29 o26
p06	handyman looking for fast estimate generation	receptive	casual	deepseek/deepseek-v4-flash	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA • situation: attending a trade show for new tools (<i>basis: users often explore new products at events</i>) Responses: • Attention: 4/5 — The bold 'Goodbye Spreadsheets. Hello Real-Time Pricing.' and the Home Depot logo grab my attention at a trade show, and the sample estimate with real numbers like \$4,302.50 makes me pause to look because I'm tired of slow manual estimates. o8 o9 o25 o14 • Credibility: 3/5 — The Home Depot partnership adds some believability, but I'm skeptical about the '3x more jobs' claim without a demo, and my main objection is that the price might be too high for me. o25 o27

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					• Action intent: 4/5 — I'd likely click 'Learn more' to see a demo and check the price, since the time savings and local pricing appeal to me, but I need to verify it fits my budget before committing. o29 o3
p07	experienced contractor needing reliable estimates	skeptical	regular	openai / gpt-4o-mini	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA • situation: reviewing tools for efficiency improvements (<i>basis: users often assess tools for business impact</i>) Responses: • Attention: 4/5 — The ad effectively captures attention with the bold statement 'Goodbye Spreadsheets. Hello Real-Time Pricing.' which resonates with my need for efficiency in estimates, making it hard to ignore. o8 o9 • Credibility: 3/5 — While the ad mentions winning '3x more remodeling jobs' and saving '20+ hours per week', my skepticism about whether it meets quality standards leads me to rate it as partly believable. o27 o28 • Action intent: 3/5 — The promise of generating instant AI estimates aligns with my job to enhance accuracy, but my high price sensitivity and need for social proof from industry peers make me hesitant, resulting in a neutral likelihood to act. o3
p08	renovation expert seeking faster estimate solutions	neutral	regular	z-ai/ glm-5.3-flash	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA • situation: looking for tools during a renovation project (<i>basis: users often seek tools while engaged in work</i>) Responses: • Attention: 4/5 — As someone whose pain is slow, manual estimating, the 'Goodbye Spreadsheets. Hello Real-Time Pricing.' before/after hook and the 'Save 20+ hours per week' claim speak directly to my job-to-be-done, and the sample Master Bathroom Remodel estimate with real line

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					items makes me pause and look closely. o8 o9 o28 o12 o17 • Credibility: 3/5 — The detailed sample estimate with realistic line items like 'Demo Floor Tile 25 x \$77.00 / HRS' and the Home Depot co-branding support my trust criterion, but unverified claims like 'win 3x more remodeling jobs' and the absence of any trial access—my key proof need—keep me from fully believing it. o17 o25 o27 o3 • Action intent: 3/5 — I'm actively looking for estimating tools mid-project, so I might click 'Learn more,' but my objection that new software takes too much effort to learn, my high switching cost from traditional methods, and the lack of a visible trial offer make me unlikely to commit beyond a look. o29 o3 o28
p09	home improvement specialist needing trustworthy estimates	receptive	regular	deeps eek/ deeps eek- v4- flash	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA • situation: searching for reliable estimating tools (<i>basis: users often compare options before deciding</i>) Responses: • Attention: 4/5 — As a home improvement specialist tired of manual guesswork, the 'Goodbye Spreadsheets' headline and the detailed sample estimate with local pricing immediately grab my attention because they directly address my pain point of slow estimate generation. o8 o9 o12 o13 o14 o15 o16 o17 o18 o19 o20 • Credibility: 3/5 — The Home Depot logo adds authority, but without ROI examples from other users, I'm still partly doubtful about whether this tool truly fits my needs and delivers on its claims of winning 3x more jobs. o25 o27 o28 • Action intent: 3/5 — I'm receptive and might click 'Learn more' because the promise of local pricing and time savings is appealing, but my medium switching cost and need for proof of fit keep me from being likely to act immediately. o29 o3 o27 o28

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
p10	seasoned contractor seeking convenient estimate tools	skeptical	expert	openai / gpt-4o-mini	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA • situation: evaluating tools for business efficiency (<i>basis: users often seek efficiency improvements in their work</i>) Responses: • Attention: 4/5 — The ad effectively captures attention with the bold statement 'Goodbye Spreadsheets. Hello Real-Time Pricing.' which resonates with my need to streamline estimating processes, making it clear that it addresses my pain point of slow estimate generation. o8 o9 • Credibility: 4/5 — The ad is mostly believable due to its association with Home Depot, a trusted brand in the industry, which provides social proof that the tool is reliable and effective for contractors like myself. o25 • Action intent: 3/5 — I might act on this ad because it promises to save 20+ hours per week and generate local pricing estimates, which align with my goal of improving business efficiency, but I need more proof regarding data security before fully committing. o28
p11	home renovation expert needing fast estimates	neutral	expert	z-ai/ glm-5. 3-flash	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA • situation: looking for new tools for project estimates (<i>basis: users often seek fast solutions for home projects</i>) Responses: • Attention: 4/5 — As someone losing hours on manual estimates, the 'Save 20+ hours per week' and line-item estimate preview (o3, o28, o17) speak directly to my pain, and 'Goodbye Spreadsheets. Hello Real-Time Pricing.' pulls me in fast. o3 o8 o9 o28 o17 • Credibility: 4/5 — The visible Home Depot logo (o25) and the concrete line-item estimate with unit costs (o15, o17) give real social proof and tangible detail,

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					though the 'win 3x more jobs' claim has no backing evidence shown. o25 o15 o17 o27 • Action intent: 3/5 — I'd likely click 'Learn more' (o29) to see a demo since speed is a key decision criterion, but as a highly price-sensitive user with the objection that pricing may be too high, no visible pricing info makes me hesitate before committing. o29 o3
p12	experienced handyman seeking reliable estimate tools	receptive	expert	deepseek/deepseek-v4-flash	Profile & answers Needs: generate AI estimates for re-modelling with local pricing Supplied (from brief): target audience is aged 20-60 in the USA • situation: researching tools for home repair estimates (<i>basis: users often compare tools before making a decision</i>) Responses: • Attention: 4/5 — As an experienced handyman tired of manual estimates, the 'Goodbye Spreadsheets' headline directly speaks to my pain, and the Home Depot logo adds familiarity, drawing me in. o8 o9 o25 • Credibility: 3/5 — I'm skeptical because the ad makes big claims like 3x more jobs and 20+ hours saved, but I don't see any user testimonials or proof from other handymen, which I need to overcome my objection; the Home Depot partnership helps a bit. o27 o28 o25 • Action intent: 3/5 — I'm interested because it promises to solve my slow estimate problem, but my high switching cost and need for social proof mean I'd only click 'Learn more' to investigate further, not sign up immediately. o3 o29
p13	DIY enthusiast seeking faster estimates	skeptical	new	openai/gpt-4o-mini	Profile & answers Needs: speed Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: frustrated with current slow estimate process (<i>basis: pain point of slow estimate generation.</i>) • job to be done: generate quick remodeling estimates (<i>basis: primary need for speed.</i>)

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					• current solution: manually calculating estimates (<i>basis: current solution is time-consuming.</i>) • objections: effort (<i>basis: top objection is effort.</i>) • proof needs: trial (<i>basis: top proof need is trial.</i>) • switching cost: medium (<i>basis: new category familiarity suggests moderate switching costs.</i>) Responses: • Attention: 4/5 — The ad effectively captures attention with the bold statement 'Goodbye Spreadsheets. Hello Real-Time Pricing.' which resonates with my frustration over slow estimates. o8 o9 • Credibility: 3/5 — The ad mentions saving 20+ hours per week and winning 3x more jobs, which sounds appealing but requires proof through a trial to convince my skeptical nature. o27 o28 • Action intent: 4/5 — Given my need for faster estimates, the promise of instant AI estimates and local pricing makes me likely to explore this solution further, especially if a trial is available. o3
p14	homeowner looking for trustworthy estimates	neutral	new	z-ai/ glm-5. 3-flash	Profile & answers Needs: trust Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: searching for reliable remodeling options (<i>basis: pain point of slow estimate generation.</i>) • job to be done: find trustworthy remodeling estimates (<i>basis: primary need for trust.</i>) • current solution: relying on word of mouth (<i>basis: current solution lacks speed.</i>) • objections: fit (<i>basis: top objection is fit.</i>) • proof needs: roi (<i>basis: top proof need is ROI.</i>) • switching cost: medium (<i>basis: new category familiarity suggests moderate switching costs.</i>) Responses: • Attention: 3/5 — As a hands-on homeowner hunting for remodeling estimates, the itemized 'Master Bathroom Remodel – 500 sq ft' breakdown with real

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					dollar figures and the familiar Home Depot logo make me pause, even though the 'win 3x more remodeling jobs' pitch is clearly aimed at contractors, not me. o12 o14 o18 o25 o8 o9 • Credibility: 3/5 — My trust-first decision criteria are partly reassured by the Home Depot co-branding and the transparent line-item pricing (e.g., 'Demo Floor Tile 25 x \$77.00 / HRS'), but the unverified 'win 3x more jobs' and 'save 20+ hours' claims are contractor business metrics, not proof that the estimates themselves are accurate for a homeowner like me relying on word of mouth. o25 o17 o18 o27 o28 • Action intent: 2/5 — My top objection is fit: this is AI estimating and proposal software for contractors trying to win jobs, so it doesn't serve my job-to-be-done of getting a trustworthy estimate for my own remodel, and with high price sensitivity I wouldn't click 'Learn more' on a B2B tool. o26 o27 o29
p15	handyman needing convenient estimates	receptive	new	deeps eek/ deeps eek- v4- flash	Profile & answers Needs: convenience Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: looking for quick estimate solutions (<i>basis: pain point of slow estimate generation.</i>) • job to be done: obtain fast remodeling estimates (<i>basis: primary need for convenience.</i>) • current solution: using spreadsheets for estimates (<i>basis: current solution is cumbersome.</i>) • objections: timing (<i>basis: top objection is timing.</i>) • proof needs: security (<i>basis: top proof need is security.</i>) • switching cost: medium (<i>basis: new category familiarity suggests moderate switching costs.</i>) Responses: • Attention: 4/5 — As a handyman needing quick estimates, the bold 'Goodbye Spreadsheets. Hello Real-Time Pricing.' grabs me because it directly addresses my pain of slow manual estimate

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					generation, and the 20+ hours saved per week is a huge draw. o8 o9 o28 • Credibility: 3/5 — The Home Depot logo adds some authority, but I'm skeptical about the 'win 3x more jobs' claim without security proof, and my timing objection makes me wonder if the AI estimates are truly instant for my remodeling jobs. o25 o27 • Action intent: 3/5 — I might click 'Learn more' because the time savings and local pricing appeal to my need for convenience and speed, but my high price sensitivity and medium switching cost from spreadsheets hold me back without more details on cost and security. o29 o3
p16	homeowner comparing remodeling costs	skeptical	casual	openai / gpt-4o -mini	Profile & answers Needs: price Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: evaluating different remodeling options (<i>basis: pain point of slow estimate generation.</i>) • job to be done: compare remodeling estimates (<i>basis: primary need for price.</i>) • current solution: gathering quotes from contractors (<i>basis: current solution is time-consuming.</i>) • objections: price (<i>basis: top objection is price.</i>) • proof needs: demo (<i>basis: top proof need is demo.</i>) • switching cost: high (<i>basis: casual familiarity suggests higher switching costs.</i>) Responses: • Attention: 4/5 — The ad captures my attention with the bold statement 'Goodbye Spreadsheets. Hello Real-Time Pricing.' which resonates with my need for faster estimates, making it clear and engaging. o8 o9 • Credibility: 3/5 — The ad mentions 'local pricing' and partnerships with Home Depot, which adds some credibility, but I still have skepticism about the actual effectiveness of the AI estimates due to my high price sensitivity and need for proof. o25 o3

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					• Action intent: 3/5 — While the ad presents a solution that could save me time and effort, my current solution of gathering quotes is deeply ingrained, and I need more proof before I consider switching to this AI tool. o3 o28
p17	DIYer seeking quality remodeling options	neutral	casual	z-ai/ glm-5. 3-flash	Profile & answers Needs: quality Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: researching remodeling solutions (<i>basis: pain point of slow estimate generation.</i>) • job to be done: find quality estimates for remodeling (<i>basis: primary need for quality.</i>) • current solution: using online calculators (<i>basis: current solution lacks depth.</i>) • objections: trust (<i>basis: top objection is trust.</i>) • proof needs: social_proof (<i>basis: top proof need is social proof.</i>) • switching cost: medium (<i>basis: casual familiarity suggests moderate switching costs.</i>) Responses: • Attention: 3/5 — As a DIYer whose biggest pain is slow, manual estimate generation, the bold 'Goodbye Spreadsheets. Hello Real-Time Pricing.' hook and the itemized Master Bathroom Remodel estimate with real dollar figures make me pause to look, even though the 'win 3x more jobs' pitch is clearly aimed at contractors, not me. o8 o9 o12 o14 • Credibility: 3/5 — Trust is my top objection and I look for social proof, so the Home Depot co-branding and the concrete line-item pricing (like \$77.00/HRS demo floor tile and \$4,302.50 demolition) make it partly believable, but unverified marketing claims such as 'win 3x more remodeling jobs' and 'Save 20+ hours per week' keep me from fully trusting it. o25 o17 o14 o27 o28 • Action intent: 2/5 — I'm a high-price-sensitivity DIYer using online calculators to estimate my own remodeling projects, and this is contractor business-management software with no pricing

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					shown and only a generic 'Learn more' CTA, so I'm unlikely to act despite the estimate detail appealing to my quality and speed criteria. o26 o29 o27
p18	handyman looking for quick estimates	receptive	casual	deepseek/deepseek-v4-flash	Profile & answers Needs: speed Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: in need of fast remodeling estimates (<i>basis: pain point of slow estimate generation.</i>) • job to be done: get quick estimates for projects (<i>basis: primary need for speed.</i>) • current solution: using paper forms for estimates (<i>basis: current solution is outdated.</i>) • objections: effort (<i>basis: top objection is effort.</i>) • proof needs: trial (<i>basis: top proof need is trial.</i>) • switching cost: medium (<i>basis: casual familiarity suggests moderate switching costs.</i>) Responses: • Attention: 4/5 — As a handyman who hates wasting hours on manual estimates, the bold 'Goodbye Spreadsheets' and time-saving claim immediately catch my attention (o3, o8, o9). o3 o8 o9 • Credibility: 3/5 — The big claims like 'win 3x more jobs' and 'save 20 hours' sound too good to be true without a trial, but the Home Depot partnership gives some trust. I need to try it first (o27, o28, o25). o27 o28 o25 • Action intent: 3/5 — The promise of instant estimates with local pricing fits my need for speed, but without seeing a price or trial option, and given my high price sensitivity, I'm only likely to click 'Learn more' to investigate further (o3, o29, o22). o3 o29
p19	contractor needing reliable estimates	skeptical	regular	openai / gpt-4o-mini	Profile & answers Needs: trust Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: looking for dependable remodeling estimates (<i>basis: pain point of slow estimate generation.</i>)

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					• job to be done: secure reliable estimates for projects (<i>basis: primary need for trust.</i>) • current solution: consulting with colleagues (<i>basis: current solution is not efficient.</i>) • objections: fit (<i>basis: top objection is fit.</i>) • proof needs: roi (<i>basis: top proof need is ROI.</i>) • switching cost: high (<i>basis: regular familiarity suggests higher switching costs.</i>) Responses: • Attention: 4/5 — The ad effectively captures attention with bold statements like 'Goodbye Spreadsheets. Hello Real-Time Pricing.' which resonate with my need for faster estimates, making it hard to ignore. o8 o9 • Credibility: 3/5 — While the ad presents a strong claim of saving time and winning more jobs, my skepticism about fit and the need for proof of ROI makes it only partly believable. o3 o27 o28 • Action intent: 3/5 — I might consider acting on this ad due to the promise of saving time and increasing job wins, but my current reliance on colleagues for estimates creates hesitation. o3 o27 o28
p20	homeowner evaluating remodeling options	neutral	regular	z-ai/ glm-5. 3-flash	Profile & answers Needs: convenience Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: comparing remodeling services (<i>basis: pain point of slow estimate generation.</i>) • job to be done: find convenient estimates for remodeling (<i>basis: primary need for convenience.</i>) • current solution: requesting multiple quotes (<i>basis: current solution is time-consuming.</i>) • objections: timing (<i>basis: top objection is timing.</i>) • proof needs: security (<i>basis: top proof need is security.</i>) • switching cost: high (<i>basis: regular familiarity suggests higher switching costs.</i>)

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					Responses: • Attention: 3/5 — As a hands-on homeowner hunting for convenient remodeling estimates, the bold 'Goodbye Spreadsheets. Hello Real-Time Pricing.' hook and the itemized Master Bathroom estimate with real dollar figures make me pause, but the 'win 3x more remodeling jobs' pitch is clearly aimed at contractors, not someone like me comparing remodeling services. o8 o9 o12 o14 o27 • Credibility: 3/5 — The Home Depot logo and the granular line-item estimate with per-unit pricing feel concrete and grounded, which helps, but as a high-price-sensitivity homeowner whose top proof need is security, I see no security assurance and the '3x more jobs' and 'Save 20+ hours' claims are unverified marketing numbers. o25 o15 o17 o27 o28 • Action intent: 2/5 — This ad sells contractor software for 'automating your proposals and client management,' not a service that hands homeowners like me convenient estimates, so with my high switching cost from my current quote-requesting routine and my timing objection, I'm unlikely to click 'Learn more.' o26 o27 o29
p21	DIY enthusiast seeking affordable estimates	receptive	regular	deepseek/deepseek-v4-flash	Profile & answers Needs: price Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: looking for budget-friendly remodeling options (<i>basis: pain point of slow estimate generation.</i>) • job to be done: obtain affordable remodeling estimates (<i>basis: primary need for price.</i>) • current solution: browsing online resources (<i>basis: current solution is inefficient.</i>) • objections: price (<i>basis: top objection is price.</i>) • proof needs: demo (<i>basis: top proof need is demo.</i>) • switching cost: high (<i>basis: regular familiarity suggests higher switching costs.</i>)

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					Responses: • Attention: 3/5 — I glanced at the bold 'Goodbye Spreadsheets. Hello Real-Time Pricing.' line, but as a DIY enthusiast looking for affordable estimates for myself, not for a contractor business, the ad's focus on winning remodeling jobs and saving 20+ hours doesn't directly grab my attention because it's clearly targeting professionals, not a 50-year-old homeowner fixing things himself. o8 o9 o27 o28 • Credibility: 2/5 — The ad seems partly believable because it shows a detailed estimate for a Master Bathroom Remodel with line-item costs ('Demolition +', '\$4,302.50'), but I'm a DIY enthusiast with high price sensitivity, and the claim 'win 3x more remodeling jobs' feels like exaggerated marketing fluff aimed at pros, not grounded in proof I can trust for my own budget-friendly remodeling. o14 o12 o27 o25 • Action intent: 1/5 — I wouldn't act on this ad because it's selling AI estimating and client management software for contractors—my job to be done is obtaining cheap DIY estimates, not running a business, plus my high price sensitivity and high switching cost mean I'd stick to browsing free online resources rather than signing up for a paid pro tool without a demo. o26 o3 o28
p22	contractor seeking quality estimates	skeptical	expert	openai / gpt-4o-mini	Profile & answers Needs: quality Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: evaluating estimate tools (<i>basis: pain point of slow estimate generation.</i>) • job to be done: secure high-quality estimates (<i>basis: primary need for quality.</i>) • current solution: using complex software (<i>basis: current solution is cumbersome.</i>) • objections: trust (<i>basis: top objection is trust.</i>) • proof needs: social_proof (<i>basis: top proof need is social proof.</i>) • switching cost: high (<i>basis: expert familiarity suggests higher switching costs.</i>)

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					Responses: • Attention: 4/5 — The ad effectively captures attention with bold statements like 'Goodbye Spreadsheets. Hello Real-Time Pricing.' which resonate with my need for efficiency, making it hard to ignore. o8 o9 • Credibility: 4/5 — The ad's association with Home Depot provides strong social proof, which addresses my trust objections and enhances its credibility. o25 • Action intent: 3/5 — While the ad presents compelling benefits like saving time and increasing job wins, my skepticism about switching tools and the high switching costs make me hesitant to act immediately. o27 o28
p23	homeowner needing fast estimates	neutral	expert	z-ai/ glm-5. 3-flash	Profile & answers Needs: speed Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: in a hurry to remodel (<i>basis: pain point of slow estimate generation.</i>) • job to be done: get quick remodeling estimates (<i>basis: primary need for speed.</i>) • current solution: using outdated methods (<i>basis: current solution is inefficient.</i>) • objections: effort (<i>basis: top objection is effort.</i>) • proof needs: trial (<i>basis: top proof need is trial.</i>) • switching cost: high (<i>basis: expert familiarity suggests higher switching costs.</i>) Responses: • Attention: 4/5 — As a homeowner in a hurry whose biggest pain is slow, hours-long estimate generation, the 'Goodbye Spreadsheets. Hello Real-Time Pricing.' hook and 'instant AI estimates' promise directly hit my need for speed, and the visible itemized estimate for a Master Bathroom Remodel makes me pause and look closely. o3 o8 o9 o12 o14 • Credibility: 4/5 — Trust is one of my decision criteria, and the Home Depot co-branding plus the concrete line-item estimate with real dollar figures (\$4,302.50 demolition, \$77.00/hr demo floor tile)

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					makes this mostly believable, though as a price-sensitive expert I'd still want a trial before fully buying the 'win 3x more jobs' and 'save 20+ hours' claims. o14 o17 o25 o27 o28 • Action intent: 2/5 — I need a quick estimate for my own remodel, but this is clearly contractor business software ('win 3x more remodeling jobs,' 'automating your proposals and client management'), so with my high switching cost and effort objection I'm unlikely to act beyond a 'Learn more' glance. o3 o26 o29
p24	contractor looking for trustworthy estimates	receptive	expert	deepseek/deepseek-v4-flash	Profile & answers Needs: trust Supplied (from brief): age range is 20-60, location is USA, interests include hands on and fixing things. • situation: seeking reliable estimate solutions (<i>basis: pain point of slow estimate generation.</i>) • job to be done: secure trustworthy remodeling estimates (<i>basis: primary need for trust.</i>) • current solution: networking with peers (<i>basis: current solution is time-consuming.</i>) • objections: fit (<i>basis: top objection is fit.</i>) • proof needs: roi (<i>basis: top proof need is ROI.</i>) • switching cost: high (<i>basis: expert familiarity suggests higher switching costs.</i>) Responses: • Attention: 4/5 — As a contractor tired of slow manual estimates, the bold headline 'Goodbye Spreadsheets. Hello Real-Time Pricing.' immediately grabs me—it speaks directly to my pain point of hours spent on estimates (o8, o9, o3). o3 o8 o9 • Credibility: 3/5 — The ad claims a 3x job win rate and 20-hour weekly savings (o27, o28) and features a Home Depot logo (o25) for authority, but as a high-switching-cost expert needing ROI proof, I don't see hard evidence like a case study or cost-benefit breakdown to back those numbers. o27 o28 o25 • Action intent: 3/5 — I'm intrigued by the AI estimates with local pricing (o3) and the time savings align with my need for trustworthy estimates, but my top

ID	SEGMENT	STANCE	FAMILIARITY	MODEL	PROVENANCE & RESPONSES
					objection is 'fit' — without a trial or ROI example, I'm not ready to switch from my peer network (current solution) yet; a 'Learn more' (o29) might get a click though. o3 o29
p25	DIY enthusiast seeking quick remodeling estimates	skeptical	new	openai / gpt-4o-mini	Profile & answers Needs: speedy estimate generation Supplied (from brief): category familiarity is expert • situation: looking for remodeling estimates online (<i>basis: users often seek quick solutions for home improvement projects.</i>) • job to be done: obtain fast and accurate remodeling estimates (<i>basis: the primary need is to reduce time spent on estimates.</i>) • current solution: manually gathering estimates from contractors (<i>basis: current methods are time-consuming and inefficient.</i>) • objections: concerns about timing of implementation (<i>basis: timing is a common concern when adopting new solutions.</i>) • proof needs: demonstrated security of personal information (<i>basis: users need assurance about data security before signing up.</i>) • switching cost: medium (<i>basis: switching from manual to automated solutions typically involves some learning curve.</i>) Responses: • Attention: 4/5 — The ad effectively captures attention with bold statements like 'Goodbye Spreadsheets. Hello Real-Time Pricing.' which resonates with my need for speed in obtaining estimates. o8 o9 • Credibility: 3/5 — While the ad presents strong claims about saving time and increasing job wins, I have concerns about the security of my personal information, which affects its believability. o27 o28 • Action intent: 3/5 — I might consider acting on this ad due to the promise of quick estimates, but my skepticism about implementation timing and data security holds me back. o3 o28
